I wanted to review the leaked *NASA Future Strategic Issues/ Future of Warfare Circa 2025* slides in the context of my research regarding nano robots, surveillance, C19 self assembly nanotechnology bioweapons and the broader stealth self assembly nanotechnology warfare agenda. **There are people who believe that the military will come and save them. However we have had ample evidence that the military and intelligence agencies actually are waging war against the population and that they are executing the transhumanist technocratic agenda.** I discussed that Ray Kurzweil, Google Engineer, prominent technocrat, Author of ‘The Singularity is Near’ has been a long time science advisor to the military regarding their future direction of research.

Astonishing Darkfield Live Blood Footage Of Nano/Microrobots In C19 Unvaccinated Blood And What did Ray Kurzweil Say About Nanorobots And the Singularity?

In fact, this NASA presentation reads just like his book. NASA itself has been implicated in geoengineering operations and I have had first hand confirmation of that by former NASA employees.

Who are the military organizations that participated in the NASA Future of warfare planning? First, we have the common groups we have heard about in relation to the development and deployment of the mRNA C19 bioweapon technology - DARPA, CIA. FBI is also mentioned. Here are a few other acronyms that are present:

NRO (National Reconnaissance Office) launches assets into orbit from locations around the world using multiple space vehicles. Ensuring our intelligence collection is the best in the world. Our government, military, and civilian workforce is pushing the technological boundaries on what is possible.

Note - the NRO has been implicated by whistleblower Dan Morris, retired Air Force career Master Sergeant involved in extraterrestrial projects with a Top Secret Clearance 38 levels above top secret specifically in extraterrestrial operations. Technology recovered from numerous ET crash sites by the US military since Roswell and reverse engineered - include microelectronics, fiber optics, night vision, material sciences and antigravity propulsion systems, which the Nazis already had in WW2 - the Nazi scientists were imported via Operation Paperclip, most prominently Wernher Van Braun who went to NASA. This technology was then given to certain corporations who patented it and made billions of dollars. (Source: Unacknowledged - Steven Greer MD). I have been talking about this technology is not from here, and I just want to note this connection for people to contemplate.

CNO The Chief of Naval Operations Strategic Studies Group was established by Chief of Naval Operations Admiral Thomas B. Hayward in 1981. The Group was co-located at the United States Naval War College in Newport, Rhode Island, and received its direction and made its reports only to the Chief of Naval Operations.

SBCCOM The United States Army Soldier and Biological Chemical Command is a support organization focused on the development, response to, and safe handling of chemical weapons.

ONI is a core element of the Navy's Information Warfare Community whose goal is to gain and hold a decisive information advantage over America's potential adversaries. ONI collects, analyzes and produces maritime intelligence and disseminates that intelligence rapidly to strategic, operational, and tactical decision makers to meet Navy, DoD, and national requirements.

NSAP Navy Science Assistance Program

DIA The Director of the Defense Intelligence Agency is a three-star **military** officer that rotates between Army, Navy, Air Force, and Marines approximately every three years and is the principal adviser to the Secretary of Defense and to the Chairman of the Joint Chiefs of Staff

TRADOC The United States **Army** Training and Doctrine Command **is** a major command of the United States **Army** headquartered at Fort Eustis, Virginia. It is charged with overseeing training of **Army** forces and the development of operational doctrine

What have all these agencies contributed as seeing the vision of future warfare in 2025? Do they like so many shadow government organizations use predictive programming or is it that THEY actually planned the current C19 bioweapon genocide and takeover of humanity via stealth nanotechnology weapons? I think this is a worthy question.

They knew about uncontrolled self replication of nanotechnology. You can look at my over 600 substack articles with documentation in live blood analysis. Here is a good synopsis:

Evidence Of Crimes Against Humanity - Darkfield Blood Microscopy

They also mention polymer growth in plants and spider silk. I have documented this extensively sprayed via geoengineering operations and dragline silk (strongest spider silk known) found as DNA contamination in C19 bioweapons.

WBAN and AI surveillance is happening now. Note they say that robotic swarm technologies are endemic worldwide. In other words, the real “pandemic” is one of biosensing nanorobots for dual use purpose coupled with digitized surveillance and digital twin cloud upload.

- In and near theater ports/airfields possibly unusable
- Beam weapons increasingly prevalent

They are discussing that this warfare on the cheap is fingerprintless, meaning nobody can trace this nanotechnological warfare to them. Microwave attacks on not just targeted individuals but the entire population is the target. Certainly the C19 bioweapons are ethnic weapons, DNA specific, they are carcinogenic, involve prions, are fatal to disabling and they kill short term within minutes of getting the C19 bioweapon shot or slow kill longterm through accelerated aging. Nobody in the world is doubting that brain function of human beings has been attacked worldwide, the misleading term “brainfog” is ubiquitous now. It is intentional warfare on the populations cognitive function. Prion disease has been documented in relation to C19 bioweapons and I have explained how that is used for self assembly nanotechnology purposes. Of course the entire biosphere is attacked, just like they are discussing (antiflora/ fauna).

We have seen since the C19 rollout the long term fingerprintless depopulation campaign, we have seen food, vitamins contaminated as well as water supply. We have heard about Ebola/ Marburg virus within the shots that can be activated via 60 GHZ pulses. They give an example how they already tested biological weapons on humans for which no treatment is available.

We know that PSYOP's - planned psychological warfare via media lies coordinated by intelligence to threaten people into lockdowns and taking the C19 bioweapon has been effectively deployed on the world population. In fact they mention anti personnel bioweapons. They also mention bioviruses into biocomputers. This can be done via frequency insertion into the brain and was discussed by Dr Robert Duncan, former CIA and DARPA employee who developed the AI world control grid software to monitor humanities brainwaves:

They also discussed human targeting and their technocratic view that humans have rapidly decreasing to negative value - meaning you can depopulate them and replace them with AI.
